

Practical Wave 1 run order

I recommend this exact order:

- ☒ Confirm Apps Script is running v1.7.6.8. — ~~Updated to v1.7.7~~
- ☒ ~~Run Create / Refresh All Templates only if templates are missing or stale.~~
- ☒ ~~Run Raw Data formatting/creation.~~
- ☒ ~~Run Format Banners Individual.~~
- ☒ ~~Run Format CP Due Date Individual.~~
- ☒ ~~Run Format Unlocked Care Plan Individual.~~
- ☒ ~~Run Create / Update Demo P.~~
- ☒ ~~Run Create Master List.~~
- ☒ ~~Run Monthly Change once.~~
- ☒ ~~Run Monthly Change again for the same month and confirm it errors.~~
- ☒ ~~Run Hide Monthly Import Sheets.~~
- ☒ ~~Run Hide Monthly Active Sheets.~~
- ☒ ~~Run Create Index Sheet / Refresh Index.~~
- ☒ ~~Run manual Organize Tabs.~~
- ☒ ~~Re-check tab order and hidden status.~~

If the archive is configured, test Archive Index / restore in the copy.

Before Sorting	After Sort	Preferred
1. Index 2. CP Due Individual 3. Unlock CP Individual 4. Demo P 5. Banners Individual 6. Banners Individual 7. CP Due Individual 8. Unlock CP Individual 9. Monthly Change Individual 10. Corrections:

System Sheets are in the order:

Dashboard Quality Report
Framework Timing Report
Format Dashboard

Should be:

Framework Timing Report
Dashboard Quality Report
Format Dashboard

they are built in order

Format Dashboard
Framework Timing Report
Dashboard Quality Report

- Is there still an error if you try to run Update Demo P without and Monthly Change sheet?
- Raw Data is not hidden after creation,
- Monthly Imports sheets are appearing before Demo P
- Archive Failed Monthly Imports and Active Sheets
- The Monthly Import Sheets processed with Format month sheet are in the correct place
-
- Dashboard Quality Workflow not running
