

Current Framework Update Log

Section (Exact Framework Specification Section Number and Title)	Current Guidance (Verbatim Current Governing Guidance)	Update Needed	Outdated Framework Text (Verbatim Existing Framework Text)	Replacement Framework Text (Verbatim Approved Replacement Text)
7.2 Dashboard Quality Report Governance	“Dashboard Quality Report is the single consolidated QA report.” “Tests shall update only their assigned section.” “The Dashboard Quality report shall not be deleted, recreated from a hidden template, fully rebuilt, or fully rewritten during normal QA execution.”	Yes	“Dashboard Quality Report is the single consolidated QA report.”	“Add Template - Dashboard Quality Report to Create / Refresh Templates. Then Dashboard Quality Quick should: copy/use the Dashboard Quality template; write only Section A–E results; not build the sheet structure; not insert/delete rows; not rebuild A–M; not restyle the sheet. Dashboard Quality Workflow should do the same for F–M.”
8.2 Dashboard Quality Section Ownership Table	“A Template Validation... B Template Header Audit... C Test 6 Date Formatting... D Test 7 Validation Failure... E Test 9 Monthly Change Subheaders... F Test 10 Dashboard Audit... G Framework Health Check...”	Yes	“Section A-J ownership”	“Dashboard Quality – Quick Sections: A Template Validation; B Template Header Audit; C Test 6; D Test 7; E Test 9. Dashboard Quality – Workflow Sections: F Dashboard Audit; G Framework Health Check; H Signoff; I Summary; J Timing Summary; K Master List Health Check; L Care Plan Sync Diagnostics.” Add Section M Workflow & Synchronization Verification.

Section (Exact Framework Specification Section Number and Title)	Current Guidance (Verbatim Current Governing Guidance)	Update Needed	Outdated Framework Text (Verbatim Existing Framework Text)	Replacement Framework Text (Verbatim Approved Replacement Text)
19. Testing Workflow Standards	“Dashboard Quality Report is the consolidated testing output.”	Yes	“Dashboard Quality Section Test Matrix” A-J only.	Add Section M verification for “Contact processing, phone split, address combine, language handling, notes summary, banner summary, Care Plan sync, and Primary PMR assignment.”
Appendix F – Framework Test Definitions	“Dashboard Quality hidden-template creation Removed. Dashboard Quality full rebuild after testing Removed. Only Sections I and J update after test sections.”	Yes	“Only Sections I and J update after test sections.”	Dashboard Quality Quick writes A-E. Dashboard Quality Workflow writes F-M. Section M verifies workflow and synchronization.
20.A Template First Formatting Standard	“Verified templates are the authoritative source of formatting.” “Output sheets shall inherit formatting from verified templates.”	Yes	Exact framework text does not list Dashboard Quality Report as a governed template.	“Add Template - Dashboard Quality Report to Create / Refresh Templates.”
Appendix A – Column Configuration Tables	“Appendix A remains the complete dashboard column configuration table and must be rebuilt from current production headers during the Appendix phase.”	Yes	Exact framework text for Dashboard Quality column widths not located in governing specification.	“change the column notes to Quality Notes. A - 260 B- 295 C - 200 - wrap D - 200 -wrap E - 200 F - 100 G - 400 - wrap”

Section (Exact Framework Specification Section Number and Title)	Current Guidance (Verbatim Current Governing Guidance)	Update Needed	Outdated Framework Text (Verbatim Existing Framework Text)	Replacement Framework Text (Verbatim Approved Replacement Text)
Appendix B – Sheet Definitions	Exact framework text for Dashboard Quality Report template as a governed sheet not located in governing specification.	Yes	Exact framework text not located in governing specification.	Add “Dashboard Quality Report” as a governed report/template sheet created through Create / Refresh Templates.
13.3 Care Plan Sync Validation	“Care Plan Sync validation shall not be assigned a new standalone Dashboard Quality section. It belongs inside Dashboard Audit and Framework Health Check.”	Yes	Exact framework text does not state Master List month as sync sheet-discovery authority.	“Master List 04.26 → CP Due 04.26 → Unlocked CP 04.26. Master List 05.26 → CP Due 05.26 → Unlocked CP 05.26. Master List month is now synchronization authority.”
14. Demo P Processing Rules	“Demo P processing is corrected to copy active Raw Data rows first, process once, and write once.” “Primary PMR ownership is not assigned or verified in Demo P because it is assigned in Raw Data and copied to Demo P.”	No	Not Applicable	Formal Modification Not Required

Section (Exact Framework Specification Section Number and Title)	Current Guidance (Verbatim Current Governing Guidance)	Update Needed	Outdated Framework Text (Verbatim Existing Framework Text)	Replacement Framework Text (Verbatim Approved Replacement Text)
11.1 PRIMARY PMR OWNERSHIP STANDARD	"Primary PMR assignment occurs during Raw Data processing and shall not be reassigned during Demo P, Master List, Disenrolled, or Monthly Change processing."	No	Not Applicable	Formal Modification Not Required
20. Performance Standards	"Dashboard Quality Operations Review section-only writes and eliminate full report rebuilds." "Highest Priority Optimization Rules... Eliminate Dashboard Quality full rebuilds."	No	Not Applicable	Formal Modification Not Required
20.B Dashboard Processing Standard	"Dashboard Authority... Sheet definitions Dashboard controlled. Header definitions Dashboard controlled. Column definitions Dashboard controlled."	No	Not Applicable	Formal Modification Not Required

Section (Exact Framework Specification Section Number and Title)	Current Guidance (Verbatim Current Governing Guidance)	Update Needed	Outdated Framework Text (Verbatim Existing Framework Text)	Replacement Framework Text (Verbatim Approved Replacement Text)
16. Framework Development Standards	"The framework shall be evolved from the current production script and shall not be rebuilt from memory." "Review requirement Always inspect the full script before modifying."	No	Not Applicable	Formal Modification Not Required
21. Versioning Standards	"Versioning standards ensure consistent release tracking, framework governance, testing accountability, and change management throughout the life of the Master List Framework."	No	Not Applicable	Formal Modification Not Required
Appendix C – Data Source Mapping Tables	Appendix C includes Demo P, Banner, Care Plan Due Date, Unlocked Care Plan, Master List, Disenrolled, Monthly Change, and Raw Data mappings.	Yes	Exact framework text does not state Master List month sheet selection for CP Due / Unlocked CP mapping.	Master List month controls CP Due and Unlocked CP report selection for synchronization validation.

Section (Exact Framework Specification Section Number and Title)	Current Guidance (Verbatim Current Governing Guidance)	Update Needed	Outdated Framework Text (Verbatim Existing Framework Text)	Replacement Framework Text (Verbatim Approved Replacement Text)
22. Protected Standards	“Protected Framework Components... Protected Behaviors... Protected Architecture... Protected Processing Standards... Protected Data Standards...”	No	Not Applicable	Formal Modification Not Required

Framework Update Review

Date 6/17/26 02:45.a.m.

Changes Identified: Dashboard Quality Template governance, Dashboard Quality A-M ownership, Section M Workflow & Synchronization Verification, Quality Notes column naming/widths/wrapping, Dashboard Quality template creation, and Master List month authority for CP Due / Unlocked CP matching.

Governance Impact: High. Dashboard Quality became the governed QA surface and no longer builds/rebuilds structure during execution.

Framework Sections Affected: 7.2, 8.2, 19, 20.A, Appendix A, Appendix B, Appendix C, Appendix F.

Appendix Updates Required: Appendix A for Dashboard Quality column formatting; Appendix B for Dashboard Quality Report as governed template/report; Appendix C for Master List month synchronization selection; Appendix F for Section M.

Script Updates Required: Create/refresh Dashboard Quality Report template; fixed-block writers; Quality Notes header; workflowVerification fix; Section M integration.

Dashboard Updates Required: Add Dashboard Quality template governance and apply approved widths/wrapping.

Validation Updates Required: Dashboard Quality Quick writes A-E; Workflow writes F-M; no full rebuild.

Timing Updates Required: Continue timing Dashboard Quality section-only writes and workflow verification; no separate timing architecture change required through v1.5.6.
